

# VividCortex

Presentation by CJ Estel

cestel = CoverMyMeds  
cestel <> VividCortex

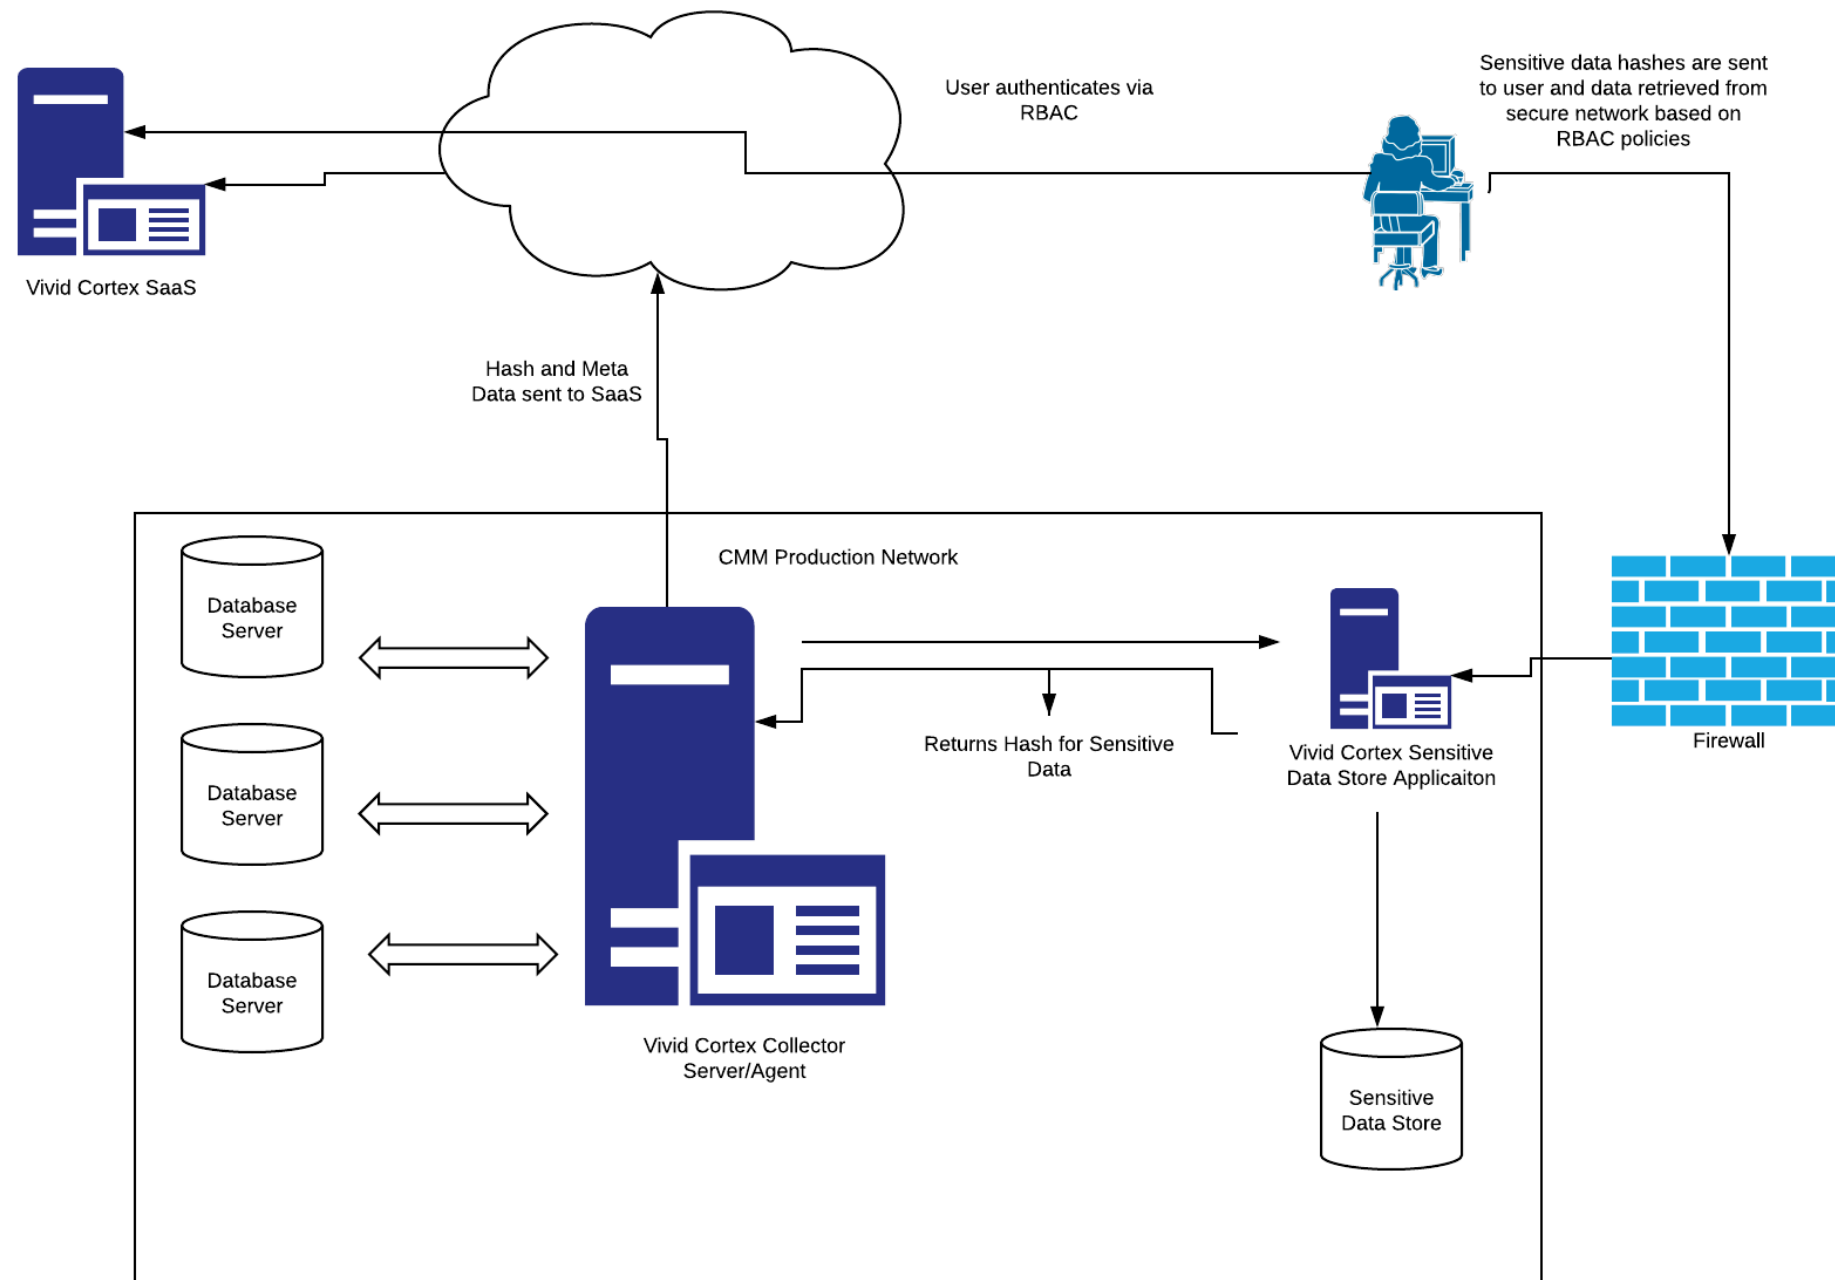

# What is VividCortex?

- An agent based monitoring system that pushes database metrics to the cloud
- A user friendly web interface that makes searching through database metrics easy
- The view is a Global view, not a server down hierarchy

# Who started VividCortex?

- Baron Schwartz - Founder and CEO
  - Author of High Performance MySQL
  - Executive at Percona prior to leaving to start VividCortex
  - Initial developer of Maatkit which became the basis for most of the Percona toolkit.

# What about Sensitive Data?

# Platforms Available

# Other Information

- Integrates with most popular alerting/monitoring platforms
- Custom event injection
- API Driven Development
- Licensing is per database host, not per user
- Notebooks can let you save state for a variety of reasons
- One the wire listening as well as other methods
- Puppet Module: <https://github.com/VividCortex/puppet>
